

1. Record Nr.	UNINA990000086930403321
Autore	Finaton, CH.
Titolo	Sondages à grandes profondeurs : notions techniques, conseil pratiques / Ch. Finaton
Pubbl/distr/stampa	Paris : C. Béranger, 1921
Descrizione fisica	110 p. : ill. ; 19 cm
Collana	Encyclopédie technique des aide-mémoire Plumon. 5. groupe ; 1
Disciplina	622.23
Locazione	FINBC
Collocazione	13 N 41 12
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA990008904190403321
Titolo	Annuario generale italiano
Pubbl/distr/stampa	Roma, : Italia Industriale Artistica
ISSN	1590-8054
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Periodico

3. Record Nr.	UNINA9910227345603321
Autore	Deubener Joachim
Titolo	Nucleation and Crystallization of Glasses and Glass-Ceramics
Pubbl/distr/stampa	Frontiers Media SA, 2017
Descrizione fisica	1 online resource (103 p.)
Collana	Frontiers Research Topics
Soggetti	History of engineering and technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The E-book "Nucleation and Crystallization of Glasses and Glass-Ceramics" highlights historic perspectives and current research in the field of glass-ceramic technology. Glass-ceramic technology is promising to provide us with materials of high strength, high toughness, unique electrical/electronic or magnetic properties, exceptional optical or unusual thermal or chemical properties. The greater diversity of microstructure-property arrangements and processing routes over glasses and ceramics are responsible that glass-ceramics are the preferred choice of materials in many technical, consumer, optical, medical/dental, electrical/electronic, and architectural fields. This includes increasing uses of glass-ceramic materials for environment and energy applications in the last decades. The positive development of glass-ceramic technology has become true in particular due to the pioneering spirit, resourcefulness, and courage of researchers of the first generation. Extraordinary and, therefore, to be distinguished is the work of the glass-ceramic inventor S. Donald Stookey to whom this Research Topic is dedicated. The authors, all experts in the field of glass-ceramics and based in industry, academia and governmental institutions, contributed to this E-book under the guidance of the Technical Committee 07 "Crystallization and Glass-Ceramics" of the International Commission on Glass (ICG).</p>
