Sommario/riassunto	This book provides a new institutional economics perspective on alternative models of local governance, offering a comprehensive view of local government organization and finance in the developing world. The experiences of ten developing/transition economies are reviewed to draw lessons of general interest in strengthening responsive, responsible, and accountable local governance. The book is written in simple user friendly language to facilitate a wider readership by policy makers and practitioners in addition to students and scholars of public finance, economics and politics.

Sommario/riassunto

The Jungian approach to analysis and psychotherapy has been undergoing an extensive reconsideration during the past decade. Analytical Psychology calls special attention to the areas that have been most impacted: the core concepts and practices of the Jungian tradition, along with relevant intellectual and historical background. Internationally renowned authors drawing on the forefront of advance in neuroscience, evolution, psychoanalysis, and philosophical and historical studies, provide an overview of the most important aspects of these developments. Beginning with a chronicle of the history of the Jungian movement, areas covered include: * a background to the notion of 'archetype' * human development from a Jungian perspective * the creative extension of Jung's theory of psychological types * re-evaluation of traditional Jungian methods of treatment in the light of contemporary scientific findings * Jungian development of transference and countertransference * a new formulation of synchronicity. Analytical Psychology presents a unique opportunity to witness a school of psychotherapy going through a renaissance. Drawing on original insights from its founder, C.G. Jung, this book helps focus and shape the current state of analytical psychology and point to areas for future exploration.
