

1.	Record Nr.	UNINA990008988360403321
	Titolo	Journal of engineering for industry
	Pubbl/distr/stampa	New York, : American Society of Mechanical Engineers
	ISSN	0022-0817
	Disciplina	620/.005
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Periodico
2.	Record Nr.	UNINA9911019697903321
	Titolo	Carbohydrate recognition in cellular function
	Pubbl/distr/stampa	Chichester [England] ; ; New York, : Wiley, 1989
	ISBN	9786612347610 9781282347618 1282347616 9780470513828 0470513829 9780470513835 0470513837
	Descrizione fisica	1 online resource (306 p.)
	Collana	Ciba Foundation symposium ; ; 145
	Altri autori (Persone)	BockGregory HarnettSara
	Disciplina	574.87/6
	Soggetti	Cell receptors Carbohydrates Cellular recognition
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	"Symposium on Carbohydrate Recognition in Cellular Function, held at the Ciba Foundation, London, 15-17 November 1988"--P v. "Editors: Gregory Bock (organizer) and Sara Harnett"--p v. "A Wiley-Interscience publication."

Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	CARBOHYDRATE RECOGNITION IN CELLULAR FUNCTION; Contents; Introduction; Oligosaccharide-protein interactions: a three-dimensional view; Multifunctional glycoprotein receptors for insulin and the insulin-like growth factors; Multiple subfamilies of carbohydrate recognition domains in animal lectins; Glycoprotein oligosaccharides as recognition structures; Binding modes of mammalian hepatic Gal/GalNAc receptors; General discussion I : Two human lysosomal membrane glycoproteins; Nucleoplasmic and cytoplasmic glycoproteins; Bioactive ganglioside-mediated carbohydrate recognition in coupling with ecto-protein phosphorylation; Role of carbohydrates in receptor-mediated fertilization in mammals; Families of neural adhesion molecules; Structural and biological properties of the carbohydrate units of nervous tissue glycoproteins; Carbohydrate recognition in neuronal development: structure and expression of surface oligosaccharides and B-galactoside-binding lectins; General discussion II : Expression of developmentally regulated carbohydrates; Function and pathology of the sugar chains of human immunoglobulin G; The role of oligosaccharides in modifying protein function; Leukosialin, a major sialoglycoprotein defining leucocyte differentiation; Final general discussion : The diversity of N-linked oligosaccharides on human immunodeficiency virus; Chairman's summing-up; Index of contributors; Subject index
Sommario/riassunto	Contributors to this volume explore the role of carbohydrates in communication between cells of multicellular organisms. Topics covered include the thermodynamics and spatial restrictions of oligosaccharide-protein interactions, the role of carbohydrates in recognition and as components of cell adhesion molecules, and abnormal glycosylation in several disease states.
