

1.	Record Nr.	UNINA990009370870403321
	Titolo	Gums and stabilisers for the food industry 15 / edited by Peter A. Williams & Glyn O. Phillips
	Pubbl/distr/stampa	Cambridge : RSC Publishing, 2010
	ISBN	9781847551993
	Descrizione fisica	XIII, 440 p. : ill. ; 24 cm
	Disciplina	664.06
	Locazione	FAGBC
	Collocazione	60 664.06 B 10
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910300327303321
	Titolo	Clinical Strategies in the Management of Diabetic Retinopathy : A step-by-step Guide for Ophthalmologists // edited by Francesco Bandello, Marco Attilio Zarbin, Rosangela Lattanzio, Ilaria Zucchiatti
	Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2014
	ISBN	3-642-54503-3
	Edizione	[1st ed. 2014.]
	Descrizione fisica	1 online resource (194 p.)
	Disciplina	610 617.7 617.7/35 617.735
	Soggetti	Ophthalmology
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references.

Nota di contenuto

Risk factors, Epidemiology and Pathophysiology of Diabetic Retinopathy
-- Non Proliferative Diabetic Retinopathy -- Proliferative Diabetic Retinopathy -- Diabetic Macular Edema.- Advanced Proliferative Diabetic Retinopathy.

Sommario/riassunto

Diabetic retinopathy (DR) and its dramatic and sight-threatening complications, such as diabetic macular edema, remain a leading cause of visual impairment among the working-age population. With the advent of effective treatments, a new era in the management of DR has been opened up: it is now possible for patients to regain a degree of visual acuity not previously expected. However, amid the deluge of approved treatments and promising new strategies, clinicians may find it difficult to choose the appropriate practice in each individual case. The purpose of this easy-to-use and richly illustrated manual is to assist ophthalmologists in making decisions in the entire management of DR based on the best available evidence. Practical and complete recommendations are provided to guide clinicians in diagnosis, decision-making, and treatment. The manual includes practical algorithms and case histories relating to all stages of DR that clearly explain the progression of the disease and will help the clinician to choose the best therapeutic approach. It will be an ideal resource for ophthalmologists aiming to provide optimal clinical management for this sight-threatening disease.
