Sommario/riassunto

This Dictionary analyses the ways in which the statuses of European citizens are profoundly affected by EU law. The study of one's particular status (as a worker, consumer, family member, citizen, etc.) helps to reconsider the legal notions concerning an individual's status at the EU level. The Dictionary includes a foreword by Evgeni Tanchev, Advocate General at the Court of Justice of the European Union, which illustrates some interesting features of the Court's case law on statuses. The Dictionary's core is composed of 79 chapters, published in alphabetical order. Each brief chapter analyses how the individual status was conditioned or created by contemporary EU law, or how the process of European integration modified the traditional juridical definition of the respective status. The Dictionary provides answers to the following questions: Has the process of European integration modified the traditional juridical definition of individual status? Has the concept of legal status now acquired a new function? What role has EU law played in developing a new modern function for the concept of individual status? Are the selection of a specific individual status by EU law and the proliferation of such statuses, which is synonymous with the creation of new privileges, collectively undermining the goal of achieving substantive equality between EU citizens? Does this constitute a return to the past? Under EU law, is it possible to create a uniform definition of the legal status of the person, over and above the definition that is provided by a given Member State's legal system?

Sommario/riassunto

This book constitutes the refereed proceedings of the 11th
International Conference on the Theory and Application of
Cryptographic Techniques in Africa, AFRICACRYPT 2019, held in Rabat,
Morocco, in July 2019. The 22 papers presented in this book were
carefully reviewed and selected from 53 submissions. The papers are
organized in topical sections on protocols; post-quantum
cryptography; zero-knowledge; lattice based cryptography; new
schemes and analysis; block ciphers; side-channel attacks and
countermeasures; signatures. AFRICACRYPT is a major scientific event
that seeks to advance and promote the field of cryptology on the
African continent. The conference has systematically drawn some
excellent contributions to the field. The conference has always been
organized in cooperation with the International Association for
Cryptologic Research (IACR).
