Sommario/riassunto

This volume is the first book of criticism to provide a systematic analysis of a corpus of emblematic contemporary British fictions from the combined perspective of trauma theory and ethics. Although the fictional work of writers such as Graham Swift has already been approached from this perspective, none of the individual works or authors under analysis in the twelve essays collected in this volume has been given such a systematic and in-depth scrutiny to date. This study, which is addressed to academics and university students of British literature and culture, focuses on the literary representation of trauma in key works by Martin Amis, J. G. Ballard, Pat Barker, John Boyne, Angela Carter, Eva Figes, Alan Hollinghurst, Delia Jarrett-Macauley, A.L. Kennedy, Ian McEwan, Michael Moorcock, Fay Weldon and Jeanette Winterson, within the context of the "ethical turn" in the related fields of literary theory and moral philosophy that has influenced literary criticism over the last three decades, with a special focus on the ethics of alterity, the ethics of truths, and deconstructive ethics.

Sommario/riassunto	"This book is a successor to J Griffiths, A Bood and H Weyers, Euthanasia and Law in the Netherlands (Amsterdam University Press 1998) which was widely praised for its thoroughness, clarity, and accuracy. The new book emphasises recent legal developments and new research, and has been expanded to include a full treatment of Belgium, where since 2002 euthanasia has also become legal. The book

also includes descriptions written by local specialists of the legal situation and what is known about actual practice in a number of other European countries (England and Wales, France, Italy, Scandinavia, Spain, Switzerland). The book strives for as complete and dispassionate a description of the situation as possible. It covers in detail: - the substantive law applicable to euthanasia, physician-assisted suicide, withholding and withdrawing treatment, use of pain relief in potentially lethal doses, palliative and terminal sedation, and termination of life without a request (in particular in the case of newborn babies); -the process of legal development that has led to the current state of the law; -the system of legal control and its operation in practice; -the results of empirical research concerning actual medical practice. A concluding part deals with some general questions that arise out of the material presented: Is the legalisation of euthanasia an example of the decline of law or should it, on the contrary, be seen as part and parcel of the increasing juridification of the doctor-patient relationship? Does the Dutch experience with legalised euthanasia support the idea of a 'slippery slope' toward a situation in which life-especially of the more vulnerable members of society-is less effectively protected? Is it possible to explain and to predict when a society will decide to legalise euthanasia?"--Bloomsbury Publishing.
