Sommario/riassunto	An important case study of chiefdom collapse and societal reemergence. Caborn-Welborn, a late Mississippian (A.D. 1400?) farming society centered at the confluence of the Ohio and Wabash Rivers (in what is now southwestern Indiana, southeastern Illinois, and northwestern Kentucky), developed following the collapse of the Angel chiefdom (A.D. 1000?). Using ceramic and settlement data, David

		Pollack examines the ways in which that new society reconstructed social, political, and economic relationships from the remnants of the Angel chiefdom. Unlike most instances of the demise of a complex socie

Sommario/riassunto

This book constitutes selected papers from the refereed proceedings of the 13th International Conference on Agents and Artificial Intelligence, ICAART 2021, which was held online during February 4–6, 2021. A total of 72 full and 99 short papers were carefully reviewed and selected for the conference from a total of 298 submissions; 17 selected full papers are included in this book. They were organized in topical sections named agents and articial intelligence.
