Sommario/riassunto

Bruce Trigger has merged the history of archaeology with new perspectives on how to understand the past. He is a critical analyst and architect of social evolutionary theory, an Egyptologist, and an authority on aboriginal cultures in north-eastern North America. His contextualization of archaeology within broader society has encouraged appreciation of the power of archaeological knowledge and he has been an effective voice for non-oppositional forms of argument in archaeological theory. In *The Archaeology of Bruce Trigger*, leading scholars discuss their own approaches to the interpretation of archaeological data in relation to Trigger's fundamental intellectual contributions.
