Collana	Atti Atti ; ; 17
Altri autori (Persone)	BardazziRossella GrassiniMaurizio
Disciplina	339
Soggetti	Economic theory & philosophy Econometrics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Proceedings, Trujillo (E), 2007.
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	In September 2007 the national team members of the International Inforum (Interindustry Forecasting Project at the University of Maryland) group held the XV annual World Conference in Trujillo, Spain. Such Conferences offer the participants to report their achievements in the different fields concerning the macroeconomic multisectoral modeling approach and data development. The national partners build their country model based on a common input-output accounting structure and a similar econometric modeling approach for sectoral and macroeconomic variables. In each Conference, the contributions refer to the wide spectrum of research activities carried on within the Inforum system of models.
