| Sommario/riassunto | The rooting of the Italian Muslim presence raises, beyond; of any exploitation, problems of different nature and difficult to solve. Inevitably, the need to understand the content of the principles and rules that govern Islam is; destined to grow and pass from the restricted circle of specialists to the most; wide audience of legal, social and cultural operators. This agile volume, created to provide students with easy-to-use didactic material, tries to intercept this question through seven lessons that summarize the peculiar profiles and the most nodes; current of the Islamic legal system such as the sources, marriage, the issue of human rights, female genital mutilation and the birth of Islamic banks. In the concluding part of the volume; given ample space to the solutions that Western legislators have (or have not) developed to meet the specific needs of Muslims living in Europe. |
