Sommario/riassunto	Help your patients through the maze of infertility treatments Infertility is suffered by around 1 in 7 couples and can be a source of confusion for both partners, providing high stress on relationships. 25% of cases are explained through male infertility, 50% through female infertility,

whilst 25% are generally unexplained. The possible causes and solutions are many and complex. Infertility, one of the first in the new Gynecology in Practice series, assists gynecologists and family practitioners to better care for their patients who have trouble conceiving. The authors provide a str
