Sommario/riassunto	In recent years, a certain number of government initiatives have demonstrated growing interest in the current and potential role of Quebec in the area of inter-American relations. As part of the questioning of the "Americanness" of Quebecers, it is necessary to determine their cultural coordinates vis-a-vis other communities of the New World. This article focuses on the parallels and contrasts, in terms of collective values, between contemporary Quebec society and other societies on the continent. The hypothesis is put forward here that Quebec is culturally located between North America - more precisely America of Anglo-Saxon tradition - and Latin America.
