Sommario/riassunto

Liver Imaging: MRI with CT Correlation is a cutting-edge book developed by a team of world-renowned MRI and CT specialists, led by Richard Semelka, MD, whose monumental, 2-volume Abdominal-Pelvic MRI, Third Edition, is the gold standard for abdominal MRI reference and teaching. This new, atlas-style book features over 500 high-quality images, and adds beautifully captured CT (computed tomographic) images as correlations to a wealth of MR (magnetic resonance) images. The result is a self-contained, completely reliable reference for dynamic imaging with MRI and CT correlations. This book provide
