

1. Record Nr.	UNINA9910131296503321
Autore	Cheung Mike W. L.
Titolo	Meta-analysis : a structural equation modeling approach // Mike W. L. Cheung
Pubbl/distr/stampa	Chichester, England ; ; West Sussex, England : , : Wiley, , 2015 ©2015
ISBN	1-118-95782-2 1-118-95783-0
Edizione	[1st edition]
Descrizione fisica	1 online resource (403 p.)
Disciplina	001.4/22
Soggetti	Statistics Meta-analysis Research - Statistical methods Sampling (Statistics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	<p>""Cover ""; ""Title Page ""; ""Copyright "";</p> <p>""Contents ""; ""Preface ""; ""Acknowledgments "";</p> <p>""; ""List of abbreviations ""; ""List of figures "";</p> <p>""; ""List of tables ""; ""Chapter 1 Introduction "";</p> <p>""; ""1.1 What is meta-analysis? Sommario/riassunto

Presents a novel approach to conducting meta-analysis using structural equation modeling. Structural equation modeling (SEM) and meta-analysis are two powerful statistical methods in the educational, social, behavioral, and medical sciences. They are often treated as two unrelated topics in the literature. This book presents a unified framework on analyzing meta-analytic data within the SEM framework, and illustrates how to conduct meta-analysis using the metaSEM package in the R statistical environment. Meta-Analysis: A Structural Equation Modeling Approach begins by introducing the impo
