Sommario/riassunto

In *Environment, Trade and Society in Southeast Asia: A Longue Durée Perspective*, eleven historians bring their knowledge and insights to bear on the long Braudelien sweep of Southeast Asian history. In doing so they seek both to debunk simplistic assumptions about fragile traditions and transformational modernities, and to identify real repeating patterns in Southeast Asia's past: clientelistic political structures, periodic tectonic and climatic disasters, ethnic occupational specializations, long cycles of economic globalization and deglobalization. Their contributions range across many centuries: from the Austronesian expansion to the Aceh tsunami, and from the Sanskrit cosmopolis to the Asian financial crisis. The book is inspired by, and dedicated to, Peter Boomgaard, a scholar whose work has embodied the Braudelien spirit in Southeast Asian historiography. This title is available online in its entirety in Open Access.
