

1. Record Nr.	UNINA9910131335503321
Autore	Oset Magdalena
Titolo	The lichen genus <i>Stereocaulon</i> (Schreb.) Hoffm. in Poland : a taxonomic and ecological study // Magdalena Oset
Pubbl/distr/stampa	Polish Botanical Society, 2014 Poland : , : Polish Botanical Society, , 2014
ISBN	83-86292-34-2
Descrizione fisica	1 online resource (81 pages) : illustrations; digital file(s)
Collana	Monographie Botanicae ; ; 104
Soggetti	Fungi Botany Earth & Environmental Sciences Stereocaulaceae Taxonomy Chemistry Kampinoski Park Narodowy (Poland)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Object of the study -- Material and methods -- Results and discussion -- Summary of results and conclusions -- References -- Plates.
Sommario/riassunto	The monograph includes the results of research of the taxonomy, chemistry, ecology and distribution of <i>Stereocaulon alpinum</i> , <i>S. botryosum</i> , <i>S. condensatum</i> , <i>S. dactylophyllum</i> , <i>S. evolutum</i> , <i>S. incrustatum</i> , <i>S. nanodes</i> , <i>S. paschale</i> , <i>S. pileatum</i> , <i>S. saxatile</i> , <i>S. subcoralloides</i> , <i>S. spathuliferum</i> , <i>S. taeniarum</i> , <i>S. tomentosum</i> and <i>S. vesuvianum</i> in Poland. 1823 specimens from Polish and some European herbaria were examined. The occurrence of <i>S. spathuliferum</i> has not been confirmed during this study, therefore its status in Poland remains unknown. During the study three lectotypes were designated. The lichenicolous fungi, <i>Cercidospora stereocaulorum</i> and <i>Roselliniella stereocaulorum</i> on <i>Stereocaulon</i> were also noted. A key to known <i>Stereocaulon</i> taxa in Poland, including <i>S. spathuliferum</i> is provided.
