2. Record Nr.	UNINA9910131505903321
Titolo	Military Communications and Information Systems (ICMCIS), 2015 International Conference on : date 18-19 May 2015 / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, New Jersey : , : IEEE, , 2015
ISBN	83-934848-1-2
Descrizione fisica	1 online resource
Disciplina	623.73
Soggetti	Communications, Military Military intelligence - Data processing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Military command and control depends on the rapid and accurate transmission and receipt of trusted information up and down the chain of command At each level in the hierarchy, different aspects of the information must be analysed and the appropriate knowledge extracted as the basis for decision making The conference aims to bring together the military, scientific and industrial communities from around the world that are working to solve these challenges The conferences provide useful fora for exchanging ideas on the development and application of new technologies to the provision of military CIS services They also create a unique opportunity to discuss these issues from different points of view and share experiences amongst European Union and NATO CIS professionals and to create multinational professional networks useful to further discuss issues and identify solutions The previous name of the conference was Military Communications and Information Systems Conference MCC.
