Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	The Carnuntum canabae legionis holds a special place in the category of the civilian suburbs of Roman fortresses. An overall plan of the canabae now exists, thanks to the intensification of aerial-archaeological evaluations in recent years in the area of present-day villages of Petronell and Bad Deutsch-Altenburg (Lower Austria, A); its richness in detail makes it unique. The hope of obtaining additional evidence regarding the expansion and chronology of the settlement - as well as the use of municipal zones (such as residential, economic and funerary areas, and open spaces) - was linked to the idea of performing a large-scale surface survey.
