

1. Record Nr.	UNINA9910132160103321
Autore	Bayes de Luna Antoni <1936->
Titolo	ECGs for beginners // Antoni Bayes de Luna
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley Blackwell, , 2014 ©2014
ISBN	1-118-82135-1 1-118-82132-7 1-118-82133-5
Descrizione fisica	1 online resource (299 p.)
Disciplina	616.1 616.1207547
Soggetti	Electrocardiography Heart - Diseases - Diagnosis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Anatomical and electrophysiological bases -- The ECG curve : what is it and how does it originate? -- Recording devices and techniques -- ECG interpretation -- Atrial abnormalities -- Ventricular enlargements -- Ventricular blocks -- Ventricular pre-excitation -- Myocardial ischemia and necrosis -- Concepts, classification, and mechanisms of arrhythmias -- ECG patterns in supraventricular arrhythmias -- ECG patterns in active ventricular arrhythmias -- The ECG patterns of passive arrhythmias -- The management of ECG tracings with arrhythmia -- From symptom to the ECG : ECGs in the presence of precordial pain or other symptoms -- The ECG in genetically induced heart diseases and other ECG patterns with poor prognosis -- ECG recordings in other heart diseases and different situations -- Abnormal ECG in a patient with normal history taking and physical exploration and normal ECG in presence of important heart diseases.
