Titolo	Advanced content delivery, streaming, and cloud services // edited by, Mukaddim Pathan, Telstra Corporation Ltd., Australia, Ramesh K. Sitaraman, University of Massachusetts, Amherst and Akamai Technologies, USA, Dom Robinson, id3as-Company Ltd., UK
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , [2014] [Piscataway, New Jersey] : , : IEEE Xplore, , [2014]
ISBN	1-118-90964-X 1-118-90969-0 1-118-90970-4
Edizione	[1st edition]
Descrizione fisica	1 online resource (1105 p.)
Collana	Wiley series on parallel and distributed computing
Altri autori (Persone)	PathanMukaddim SitaramanRamesh Kumar <1964-> RobinsonDom
Disciplina	004.67/82
Soggetti	Cloud computing Computer networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.

Sommario/riassunto

"As the subject area of CDN gains research interest and momentum, it is crucial to stay up-to-date with recent developments of its evolutionary track, as well as the current landscape and roadmap. This book provides performance models, case studies, business analyses, and several other important components, so practicing engineers and academics can use the text as a timely reference. Provides an in-depth look at Cloud-based CDNs Includes CDN and streaming media basics and tutorials. Aimed to instruct systems architects, practitioners, product developers, and researchers. Material is divided into introductory subjects, advanced content, and specialist areas"--
"Provides market analysis as a valuable reference point for commercial entities interested in investing in the CDN business"--
