

1. Record Nr.	UNINA9910132245703321
Autore	Szende Agota
Titolo	Self-Reported Population Health: An International Perspective based on EQ-5D // edited by Agota Szende, Bas Janssen, Juan Cabases
Pubbl/distr/stampa	Cham, : Springer Nature, 2014 Dordrecht : , : Springer Netherlands : , : Imprint : Springer, , 2014
ISBN	94-007-7596-2
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (196 pages) : illustrations
Disciplina	610
Soggetti	Medicine Public health Medical research Biomedicine, general Public Health Quality of Life Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface.- Data and Methods.- Population Norms for the EQ-5D -- Cross-Country Analysis of EQ-5D Data -- Socio-demographic Indicators based on EQ-5D -- Annex 1 -- Annex 2.
Sommario/riassunto	The EQ-5D instrument, as a standardized, cross-culturally validated measure of self-assessed health has a hugely important role in understanding population health within and across countries. Over the past two decades a wealth of international population health survey data have been accumulated by the EuroQoI Group from research conducted in many countries across four continents. One of the success factors of the EQ-5D instruments has been the easy availability of national or international sets of EQ-5D data, as well as clear explanations and guidance for users. There is an unmet need to produce a comprehensive book that captures up-to-date and expanded information of EQ-5D self-reported health and index values. EQ-5D population norms and cross-country analyses are provided from representative national surveys of 20 countries and additional regional surveys. This book will be a must for those who believe that how

people report and value health is very important.
