Sommario/riassunto	"Gender equality is one of the ten core principles of the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security. This guide aims to assist in its implementation through the achievement of responsible gender-equitable governance of land tenure. The guide focuses on equity and on how land tenure can be governed in ways that address

the different needs and priorities of women and men. Gender-equitable governance of land tenure ensures that women and men can participate equally in their relationships to land, through both formal institutions and informal arrangements for land administration and management. The guide provides advice on mechanisms, strategies and actions that can be adopted to improve gender equity in the processes, institutions and activities of land tenure governance."--Publisher's description.
