

1. Record Nr.	UNINA9910132308503321
Titolo	High Density Lipoproteins : From Biological Understanding to Clinical Exploitation // edited by Arnold von Eckardstein, Dimitris Kardassis
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-09665-6
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (xiii, 694 pages) : colour illustrations; digital, PDF file (s)
Collana	Handbook of Experimental Pharmacology ; ; 224
Disciplina	572.68
Soggetti	Pharmacology Molecular biology Human physiology Immunology Cell biology Pharmacology/Toxicology Molecular Medicine Human Physiology Cell Biology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Preface -- Part 1. Physiology of HDL -- Part 2. Pathology of HDL -- Part 3. Possible Indications and Target Mechanisms of HDL Therapy -- Part 4. Treatments for Dyslipidemias and Dysfunction of HDL.
Sommario/riassunto	In this Handbook of Experimental Pharmacology on "High Density Lipoproteins – from biological understanding to clinical exploitation" contributing authors (members of COST Action BM0904/HDLnet) summarize in more than 20 chapters our current knowledge on the structure, function, metabolism and regulation of HDL in health and several diseases as well as the status of past and ongoing attempts of therapeutic exploitation. The book is of interest to researchers in academia and industry focusing on lipoprotein metabolism, cardiovascular diseases and immunology as well as clinical

pharmacologists, cardiologists, diabetologists, nephrologists and other clinicians interested in metabolic or inflammatory diseases.
