

1. Record Nr.	UNINA9910132329803321
Titolo	Proceedings of the 240 Conference : science's great challenges // edited by Aaron R. Dinner
Pubbl/distr/stampa	Hoboken, New Jersey : , : John Wiley & Sons Inc., , [2015] ©2015
ISBN	1-118-95961-2 1-118-95960-4 1-118-95962-0
Descrizione fisica	1 online resource (364 p.)
Collana	Advances in chemical physics ; ; volume 157
Classificazione	SCI013050SCI009000TEC009010
Disciplina	541/.2
Soggetti	Chemistry, Physical and theoretical Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	PROCEEDINGS OF THE 240 CONFERENCE: SCIENCE'S GREAT CHALLENGES: ADVANCES IN CHEMICAL PHYSICS VOLUME 157; EDITORIAL BOARD; CONTRIBUTORS TO VOLUME 157; PREFACE; SESSIONS AT THE "240" CONFERENCE (SEPTEMBER 13-15, 2012); CONTENTS; Part I The Emergence and Breakdown of Complexity; 1 Features of Complexity; I. Introduction; II. The Emergence of Classical Dynamics from the Underlying Quantum Laws; A. Insight from Quantum Control Theory; III. The Emergence of Thermodynamical Phenomena; A. The Quantum Otto Cycle; B. Quantum Dynamics of the Working Medium; C. Quantum Thermodynamics D. The Quantum TricycleE. The Third Law of Thermodynamics; IV. Perspective; Acknowledgments; References; Discussion; 2 Exploring Quantum-Classical Boundary; I. Motivation; II. Development of Experimental Tools; III. Toward the Quantum-Classical Boundary; Acknowledgements; References; Discussion; 3 Transition from Atoms to Clusters to Condensed Matter; Acknowledgments; References; Discussion; 4 Free Energies of Staging a Scenario and Perpetual Motion Machines of the Third Kind; I. Introduction; II. Perpetual Motion Machines of the Third Kind; III. The Free Energy Cost of Staging A

## Scenario

A. A Trivial Scenario: Protein Folding  
B. Staging Free Energy; IV. Near PM3 Processes; V. Energy Sources for Staging; VI. Conclusions; Acknowledgments; References; 5 Finite-Time Thermodynamics Tools to Analyze Dissipative Processes; I. Introduction; II. Tricycles; III. Thermodynamic Length; IV. Work Deficiency; V. Accounting for Staging Free Energy with Network Thermodynamics; VI. Conclusion; References; 6 New Types of Complexity in Chemical Kinetics: Intersections, Coincidences, and Special Symmetrical Relationships; I. Introduction; II. Intersections and Coincidences  
III. Dual Experiments and Joint Kinetics  
IV. Conclusions; References; 7 Opportunities in the Area of Noise in Biological Reaction Networks; I. Inferring Regulatory Relationships from Noise; II. Noise that is Integral to Biological Function; III. Energy Use; Acknowledgments; References; Discussion; 8 Thermodynamic Approach to Chemical Networks; I. Introduction; II. The Classical Setting; III. Thermodynamic Signatures and Their Limitations; IV. Mesoscopic-Level Description; V. Stochastic Thermodynamics; VI. Dynamical Systems as Networks; VII. Information Processing; VIII. Conclusions  
Acknowledgments  
References; 9 On the Emergence of Simple Structures in Complex Phenomena: Concepts and Some Numerical Examples; I. Introduction: Structures in "Spectra of Numbers" Motto: Simplex Sigillum Veri [1]; II. Statistical Properties of Numbers and Spectra; III. Structures in Time-Dependent Dynamics; IV. Conclusions and Outlook; Acknowledgment; References; Discussion; 10 The Emergence of Simplicity from Complexity; References; Part II Dynamics at extremes; 11 On the Way to a Theory of Solid State Synthesis: Issues and Open Questions  
I. Motivation and General Research Program for a Theory of Solid State Synthesis

### Sommario/riassunto

"Based on the '240' Conference held at the University of Chicago in September of 2012, this special volume of The Advances in Chemical Physics series celebrates scientific research contributions and careers of R. Stephen Berry, Stuart A. Rice and Joshua Jortner"--
