

1. Record Nr.	UNINA9910132397803321
Autore	Sato Takuro
Titolo	Smart grid standards : specifications, requirements, and technologies / / Takuro Sato, Waseda University, Japan [and seven others]
Pubbl/distr/stampa	Singapore : , : John Wiley & Sons Inc., , [2015]
ISBN	1-118-65379-3 1-118-65377-7 1-118-65372-6 9781118653692 9781118653777
Descrizione fisica	1 online resource (484 p.)
Disciplina	621.3102/18
Soggetti	Smart power grids - Standards energy grid smart technology electrical energy energy resources standard
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Title Page; Copyright; Contents; About the Authors; Preface; Acknowledgments; Chapter 1 An Overview of the Smart Grid; 1.1 Introduction; 1.2 An Overview of Smart Grid-Related Organizations; 1.2.1 SDOs Dealing with the Smart Grid; 1.2.2 Technical Consortia, Forums, and Panels Dealing with the Smart Grid; 1.2.3 Other Political, Market, and Trade Organizations, Forums, and Alliances; 1.3 Status of the United States (US); 1.3.1 Strategy Development and Planning; 1.3.2 Policy and Law Enforcement; 1.3.3 Government and Company Pilot Projects; 1.4 Status of the European Union (EU) 1.4.1 Activities of the European Union 1.4.2 Activities of EU Member Countries; 1.5 Status of Japan; 1.6 Status of South Korea; 1.7 Status of China; 1.8 Conclusions; References; Chapter 2 Renewable Energy Generation; 2.1 Introduction; 2.2 Renewable Energy Systems and the Smart Grid; 2.2.1 Hydroelectric Power; 2.2.2 Solar Energy; 2.2.3 Wind

Energy; 2.2.4 Fuel Cell; 2.2.5 Geothermal Energy; 2.2.6 Biomass; 2.3 Challenges of Renewable Energy Systems; 2.3.1 High Capital Cost; 2.3.2 Integrating Renewable to the On-Grid; 2.3.3 Reliable Supply of Power; 2.3.4 Power Transmission
2.3.5 Power Distribution 2.4 Conclusion; References; Chapter 3 Power Grid; 3.1 Power Grid Systems; 3.2 An Overview of the Important Key Standards for the Power Grid; 3.3 Communications in the Smart Grid; 3.3.1 Communications for Substations: IEC 61850 Standards; 3.3.2 Communications for Telecontrol: IEC 60870-5 Standards; 3.3.3 Inter-Control Center Communications: IEC 60870-6 Standards; 3.4 Energy Management Systems; 3.4.1 Application Program Interface: the IEC 61970 Standards; 3.4.2 Software Inter-Application Integration: the IEC 61968 Standards; 3.5 Teleprotection Equipment
3.5.1 An Overview of the IEC 608343.5.2 Types of Teleprotection Command Schemes; 3.5.3 Requirements for Command Type Teleprotection Systems; 3.5.4 Teleprotection System Performance Requirements; 3.5.5 Teleprotection System Performance Tests; 3.6 Application Cases of Related Standards in the Power Grid; 3.6.1 Case 1: Engineering Process in Smart Substation Automation; 3.6.2 Case 2: Information Exchange Services and Service Tracking; 3.7 Analysis of Relationships among Related Standards; 3.7.1 IEC 61970 and IEC 61968; 3.7.2 IEC 61850 and IEC 61970; 3.7.3 IEC 61850 and IEC 60870
3.7.4 TASE. 2 and MMS 3.7.5 Latest Progresses of Related Standards; 3.8 Conclusion; Appendix 3.A A SED File Example (Extensible Markup Language); References; Chapter 4 Smart Storage and Electric Vehicles; 4.1 Introduction; 4.2 Electric Storage; 4.2.1 An Overview of Electric Storage; 4.2.2 Electric Storage Technologies and Applications; 4.2.3 Standardization Projects and Efforts; 4.3 Distributed Energy Resources; 4.3.1 An Overview of Distributed Energy Resources; 4.3.2 Technologies and Applications; 4.3.3 Various Standardization Processes and Projects; 4.4 E-Mobility/Electric Vehicles
4.4.1 Introduction of E-Mobility/Electric Vehicles

Sommario/riassunto

With numerous existing Smart Grid standards, it is clear that governments and industrial organizations world-wide have understood and acknowledged the critical role they play. This timely book is a useful guide for Smart Grid professionals in easily classifying fundamental Smart Grid standards, and to quickly find the building blocks they need to analyse and implement a Smart Grid system. The standards are organized in a systematic manner that aids identification, according to grid requirements.
