| | Livello bibliografico | Monografia |
| | Sommario/riassunto | Guidelines are provided for Temporary Protective Grounding (TPG) of electric power lines to assist in protection of workers from voltages and currents that might develop at a de-energized worksite during maintenance of ac overhead and underground, transmission and |

distribution lines, cables, and equipment. Other forms of worker protection include isolation and insulation. These methods are described in other documents and guides and are not discussed here.
