

1. Record Nr.	UNINA9910132443603321
Autore	Gibson Roger <1944->
Titolo	A practical guide to disruption and productivity loss on construction and engineering projects // Roger Gibson
Pubbl/distr/stampa	West Sussex, England : , : John Wiley & Sons Inc., , 2015 ©2015
ISBN	1-118-99215-6 1-118-99218-0 1-118-99217-2
Descrizione fisica	1 online resource (423 p.)
Classificazione	LAW019000
Disciplina	343.4107/8624
Soggetti	Construction contracts - Great Britain
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- Contracts and case law -- Programmes and record keeping -- Delay and disruption -- Loss of productivity -- Acceleration and mitigation.
Sommario/riassunto	"Disruption of a construction project is of key concern to the contractor as any delay to the project will involve the contractor in financial loss, unless those losses can be recovered from the employer. It is, however, acknowledged that disruption claims in construction are difficult to prove, usually the result of poor or inaccurate project records, but the cost of lost productivity or reduced efficiency to the contractor under these circumstances is very real. Practical Guide to Disruption and Productivity Loss on Construction & Engineering Projects is clearly written to explain the key causes of disruption and productivity loss. Disruption claims rest on proof of causation, so it discusses the project records that are necessary to demonstrate the causes of disruption, lost productivity and reduced efficiency in detail. Quantification of a disruption claim in terms of delay to activities and the associated costs are also fully discussed. With many worked examples throughout the text, this will be an essential book for anyone either preparing or assessing a disruption and loss of productivity claims, including architects, contract administrators, project managers and quantity

surveyors as well as contractors, contracts consultants and construction lawyers"--
