

1. Record Nr.	UNINA9910132524003321
Titolo	2013 4th IEEE International Symposium on Power Electronics for Distributed Generation Systems (PEDG) // Institute of Electrical and Electronics Engineers (IEEE) Staff
Pubbl/distr/stampa	Piscataway, New Jersey : , : Institute of Electrical and Electronics Engineers (IEEE), , 2013
Descrizione fisica	1 online resource
Disciplina	621.317
Soggetti	Power electronics Renewable energy sources Distributed generation of electric power
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Theory, analysis, design, development, test and deployment relevant to power electronics for distributed generation and renewable energy systems, including integration of renewable sources with power electronic converters and their control communication, control, monitoring, protection and interconnection of DGs and renewable energy systems microgrid and smart grid application standards and practices.
