Sommario/riassunto

Text in Hebrew. This is a work of translation, editing and addition of many footnotes and supplements to the monumental Beitrage zur Kenntnis des Karmels written by Graf Eberhardt von Mlinen, a famous Swiss researcher and diplomat. His book was published in Leipzig by Baedeker publishing, 1908. The book is a meticulous and professional exploration of Mount Carmel in the beginning of the 20th Century and it is an important stepping stone in the chronology of its study. This Interdisciplinary study of Mount Carmel is the only one of its kind written up to date and it includes: Arabic Dialectology, Botany, Zoology, General Geography, Geology, Climate, Anthropology, Religion, Archeology, Folklore and more.
