Disciplina 595.709152 634.9/67 634.967 Soggetti Forest insects Insects Electronic books. Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Description based upon print version of record. Note generali Includes bibliographical references and index. Nota di bibliografia Nota di contenuto Forest Entomology: A Global Perspective; Contents; Acknowledgements; The Author; Preface; 1: The World's Forests and their Dynamics; 2: Forest Insect Dynamics; 3: Forest Insect and Human Interactions; 4: Monitoring Forest Insects, their Damage and Damage Potential; 5: Forest insect management; 6: Forest Insect Orders and Families; 7: Foliage Feeding Insects - Lepidoptera; 8: Other Foliage Feeding Insects; 9: Bark and Ambrosia Beetles; 10: Large Cambium and Wood Boring Insects; 11: Sucking Insects; 12: Gall Insects; 13: Tip, Shoot and Regeneration Insects 14: Insects of Tree Reproductive Structures15: Insects of Wood in Use: References; Subject and Taxonomic Index; Host Index; Colour Plates

Insects are the most abundant and diverse organisms that inhabit our planet and are found in all the world's forest ecosystems. Many feed and/or breed on parts of trees. Some perform important functions,

Sommario/riassunto

such as pollination or break-down of dead vegetation. Others weaken, deform or kill trees, and compete with humans for the many goods and services that trees and forests provide. Forest Entomology: A Global Perspective examines forest insects in a global context and reviews their dynamics, interactions with humans and methods for monitoring and management of species that dama
