

1. Record Nr.	UNINA9910133223203321
Autore	Millar R. B (Russell B.)
Titolo	Maximum likelihood estimation and inference [[electronic resource]] : with examples in R, SAS, and ADMB / / Russell B. Millar
Pubbl/distr/stampa	Chichester, Sussex, U.K. ; ; Hoboken, N.J., : Wiley, 2011
ISBN	1-119-97771-1 1-283-20291-3 9786613202918 0-470-09484-2 0-470-09483-4
Descrizione fisica	1 online resource (378 p.)
Collana	Statistics in practice
Classificazione	MAT029000 SK 830
Disciplina	519.5/44
Soggetti	Estimation theory Chance - Mathematical models R (Computer program language)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Preliminaries -- pt. 2. Pragmatics -- pt. 3. Theoretical foundations.
Sommario/riassunto	"Applied Likelihood Methods provides an accessible and practical introduction to likelihood modeling, supported by examples and software. The book features applications from a range of disciplines, including statistics, medicine, biology, and ecology. The methods are implemented in SAS--the most widely used statistical software package--and the data sets and SAS code are provided on a Web site, enabling the reader to use the methods to solve problems in their own work. This book serves as an ideal text for applied scientists and researchers and graduate students of statistics"--
