- Sommario/riassunto** Peu de régions du monde ont pris, en une seule décennie, autant d'importance économique, financière, stratégique, diplomatique, religieuse et culturelle que la péninsule Arabique. Retrait des

Britanniques à l'est de Suez, conflit de 1973 et hausses du pétrole jalonnent la mise en place de structures administratives et de politiques économiques aux puissants moyens financiers. Elles entraînent une urbanisation accélérée, des migrations de grande ampleur, une montée de la consommation phénoménale et mettent en cause une personnalité et des structures sociales très protégées jusque là. Une volonté de retour à la loi islamique est proclamée bien au-delà du berceau de l'Islam. Les pays pétroliers jouent un rôle diplomatique croissant, notamment par le canal des fonds arabes de développement. Tout dans la péninsule Arabique, ou presque, est aujourd'hui objet de changements radicaux. Ouvrage collectif destiné à un public attentif mais non spécialiste, La péninsule Arabique d'aujourd'hui offre dans un tome I une présentation systématique de cette région du monde arabe, voisine chaque jour de nouveaux conflits.
