Autore	Stern Nicholas
Titolo	Managing climate change : climate, growth and equitable development : inaugural lecture delivered on Thursday 4 February 2010 // Nicholas Stern
Pubbl/distr/stampa	Collège de France, 2010 France : , : Collège de France, 2010
ISBN	2-7226-0267-9
Descrizione fisica	1 online resource (50 pages) : digital file(s)
Collana	Lecons inaugurales du College de France
Soggetti	Earth & Environmental Sciences Meteorology & Climatology
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Scale and Risks -- Policy and Opportunity -- Towards a Global Agreement
Sommario/riassunto	Climate change has been the source of immense challenges for ethical, economic or political analysts. We are aware of the scale of the action required to be taken and the areas in which that action is needed namely efficient energy use, low carbon technologies or deforestation. We have an idea of which technologies need to be developed. We understand the basic economic policy incentives in favour of reducing emissions, stopping deforestation and promoting more sensible use of our natural environment and its resources. The main challenge today is to obtain political adherence to actually accomplishing these changes.
