

1. Record Nr.	UNINA9910133569503321
Titolo	2013 IEEE International Instrumentation and Measurement Technology Conference
Pubbl/distr/stampa	[Place of publication not identified], : IEEE, 2013
ISBN	9781467346238 1467346233
Descrizione fisica	1 online resource
Disciplina	621.38154
Soggetti	Electronic instruments Engineering instruments
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	[Front cover] -- 2013 IEEE International Instrumentation and Measurement Technology Conference (12MTC 2013) Proceedings [Copyright notice] -- Table of contents -- [Front matter] -- Estimation of in-tube oil film thickness using electrical capacitance tomography -- Diagnostic radiography: An experimental study for estimation of optimal patient dose -- Reliable measurement of Wireless Sensor Network data for forecasting wellness of elderly at smart home -- An embedded inductively coupled printed circuit board based corrosion potential sensor -- An embeddable microwave patch antenna module for civil engineering applications -- Characterization of multi-standard Power Line Communication on low-voltage grid.
