Sommario/riassunto

This collection of essays in Governing Global Land Deals provides new empirical and theoretical analyses of the relationships between global land grabs and processes of government and governance. Reframes debates on global land grabs by focusing on the relationship between large-scale land deals and processes of governance Offers new theoretical insights into the different forms and effects of global land acquisitions Illuminates both the micro-processes of transaction and expropriation, as well as the broader structural forces at play in global land deals<
