

1. Record Nr.	UNINA9910134806203321
Titolo	Pragmatism and embodied cognitive science : from bodily intersubjectivity to symbolic articulation / / edited by Roman Madzia and Matthias Jung
Pubbl/distr/stampa	Berlin, [Germany] : , : De Gruyter, , 2016 ©2016
ISBN	3-11-047893-5 3-11-048023-9
Descrizione fisica	1 online resource (312 p.)
Collana	HUMANPROJEKT : Interdisziplinare Anthropologie, , 1868-8144 ; ; Band 14
Disciplina	144/3
Soggetti	Pragmatism Philosophy of mind Cognitive science Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and indexes.
Nota di contenuto	Frontmatter -- Contents -- Introduction: What a Pragmatist Cognitive Science Is and What It Should Be -- Pragmatic Interventions into Enactive and Extended Conceptions of Cognition -- Pragmatism, Embodiment, and Extension -- Pragmatism, Phenomenology, and Extended Cognition -- Embodied Cognitive Science, Pragmatism, and the Fate of Mental Representation -- Pragmatism, Cognitive Science, and Embodied Mind -- Why It's Better Be Pragmatism: Assembling Some Philosophical Foundations for Future Cognitive Science -- Recovering Philosophy from Cognitive Science -- The Embodied "We": The Extended Mind as Cognitive Sociology -- Sympathy and Empathy: G. H. Mead and the Pragmatist Basis of (Neuro)economics -- Mind, Symbol and Action-Prediction: George H. Mead and the Embodied Roots of Language -- Dewey, Enactivism, and Greek Thought -- Peirce on Abduction and Embodiment -- William James and John Dewey on Embodied Action-Oriented Emotions -- Feeling as the Force Dynamics of Thought. The Role of Feeling in the Jamesian Stream of Thought --

Sommario/riassunto

This book endeavors to fill the conceptual gap in theorizing about embodied cognition. The theories of mind and cognition which one could generally call "situated" or "embodied cognition" have gained much attention in the recent decades. However, it has been mostly phenomenology (Heidegger, Merleau-Ponty, etc.), which has served as a philosophical background for their research program. The main goal of this book is to bring the philosophy of classical American pragmatism firmly into play. Although pragmatism has been arguably the first intellectual current which systematically built its theories of knowledge, mind and valuation upon the model of a bodily interaction between an organism and its environment, as the editors and authors argue, it has not been given sufficient attention in the debate and, consequently, its conceptual resources for enriching the embodied mind project are far from being exhausted. In this book, the authors propose concrete subject-areas in which the philosophy of pragmatism can be of help when dealing with particular problems the philosophy of the embodied mind nowadays faces - a prominent example being the inevitable tension between bodily situatedness and the potential universality of symbolic meaning.

2. Record Nr.	UNINA9910455544303321
Autore	Dixson A. F
Titolo	Sexual selection and the origins of human mating systems [[electronic resource] /] / Alan F. Dixson
Pubbl/distr/stampa	Oxford ; New York, : Oxford University Press, 2009
ISBN	1-282-32870-0 9786612328701 0-19-156973-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (229 p.)
Collana	Oxford biology
Disciplina	591.56/2
Soggetti	Sex Sexual selection in animals Human behavior Human evolution Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 187-208) and index.
Nota di contenuto	Contents; List of Abbreviations; 1 A Glance at the Terrain; 2 Making Holes in the Dark; 3 Masculine Dimensions; 4 Cryptic Female Choices; 5 Copulatory Patterns; 6 The Oestrus That Never Was; 7 Human Sexual Dimorphism: Opposites Attract; 8 Adam's Apple; 9 The Road to Truth; Bibliography; Index
Sommario/riassunto	Comparative analyses of the anatomy, reproductive physiology, and behaviour of extant primates and other mammals can offer important insights into the origins of human sexual behaviour, allowing us to reconstruct the origins of human mating systems, the evolution of sexual attractiveness, patterns of mate choice, and copulatory behaviour. Sexual Selection and the Origins of Human Mating Systems provides a modern synthesis of research on the evolution of human mating systems, bringing together work on reproductive physiology, behavioural biology, anthropology, primatology, palaeontology, evolution and genetics.
