| Sommario/riassunto      | This journal is primarily targeted at professionals dealing with the marketing of scientific and research organizations. Its target readers include the staff of research institutes, higher education institutions, academic research centres, and organizations, associations and establishments providing assistance in scientific research, as well as students and all those who are interested in the subjects covered by the research. The main goal of the journal is to present the newest research results and practical solutions that are being implemented by scientific |

and research organisations amongst which are the leading European scientific institutes, education institutions and technology parks.
