

1. Record Nr.	UNINA9910135153103321
Titolo	IEEE Std C37.111-1999 : IEEE Standard Common Format for Transient Data Exchange (COMTRADE) for Power Systems // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 1999
ISBN	0-7381-1667-X
Descrizione fisica	1 online resource (56 pages)
Disciplina	620.00452
Soggetti	System failures (Engineering) Failure analysis (Engineering)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	A common format for data files and exchange medium used for the interchange of various types of fault, test, or simulation data for electrical power systems is defined. Sources of transient data are described, and the case of disketts as an exchange medium is recommended. issues of sampling rates, filters, and sample rate conversions for transient data being exchanged are discussed. Files for data exchange are specified, as is the organization of the data. A sample file is given.
