

1. Record Nr.	UNINA9910135154503321
Titolo	IEEE Std 973-1990 : IEEE Standard Definitions of Switching System Performance in a Telecommunications Environment / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	New York, NY, USA : , : IEEE, , 1990
ISBN	0-7381-4429-0
Descrizione fisica	1 online resource (20 pages)
Disciplina	001.40218
Soggetti	Telecommunication - Switching systems Switching circuits
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This standard provides definitions of switching system performance in a telecommunications environment. It includes parameters in seven categories: (1) customer access; (2) network reliability; (3) billing; (4) transmission; (5) operating company; (6) customer signaling; (7) network service; The dimensions and critical aspects of each parameter are presented without numerical values. The definitions will facilitate a description of switching requirements for different networks and applications. Each application may be characterized by its own set of parameters and values. This standard provides definitions that will promote a consistent interpretation of performance by users, service providers, manufacturers, and designers.
