Disciplina	610/.1
Soggetti	Medicine - Philosophy Medical anthropology
Lingua di pubblicazione	Portoghese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Set of articles, fruits of research by anthropologists, focused on the health area. First work of its kind in the country, which deepens mental health issues, cosmological view of specific groups, relationships between body, mind and culture and healing issues seen from the perspective of various popular religions. The work contrasts with the efforts of health scholars to approach anthropological approaches, so that it becomes an instrument for understanding the health / disease phenomenon and its complex articulation processes.
