Titolo	The Alor-Pantar languages : history and typology // edited by Marian Klamer
Pubbl/distr/stampa	Language Science Press, 2014 Berlin, Germany : , : Language Science Press, , 2014 ©2014
Descrizione fisica	1 online resource (469 pages) : illustrations; digital, PDF file(s)
Collana	Studies in Diversity Linguistics ; ; volume 3
Disciplina	499.12
Soggetti	Alor-Pantar languages Alor-Pantar languages - History Typology (Linguistics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	The Alor-Pantar family constitutes the westernmost outlier group of Papuan (Non-Austronesian) languages. Its twenty or so languages are spoken on the islands of Alor and Pantar, located just north of Timor, in eastern In- donesia. Together with the Papuan languages of Timor, they make up the Timor-Alor-Pantar family. The languages average 5,000 speakers and are under pressure from the local Malay variety as well as the national lan- guage, Indonesian. This volume studies the internal and external linguistic history of this interesting group, and showcases some of its unique typological features, such as the preference to index the transitive patient-like argument on the verb but not the agent-like one; the extreme variety in morphologi- cal alignment patterns; the use of plural number words; the existence of quinary numeral systems; the elaborate spatial deictic systems involving an elevation component; and the great variation exhibited in their kinship systems. Unlike many other Papuan languages, Alor-Pantar languages do not ex- hibit clause-chaining, do not have switch reference systems, never suffix subject indexes to verbs, do not mark gender, but do encode clusivity in their pronominal systems. Indeed,

apart from a broadly similar head-final syntactic profile, there is little else that the Alor-Pantar languages share with Papuan languages spoken in other regions. While all of them show some traces of contact with Austronesian languages, in general, borrowing from Austronesian has not been intense, and contact with Malay and Indonesian is a relatively recent phenomenon in most of the Alor-Pantar region.

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	10.5 Neoplastic Pericarditis
Sommario/riassunto	This book reviews current knowledge and recent advances in the diagnosis and management of myopericardial diseases, a spectrum of medical diseases and syndromes affecting a significant proportion of patients in clinical practice and presenting either as an isolated process or as a manifestation of a systemic disease. Unlike in other books, both pericardial and myocardial diseases are fully covered. Detailed guidance

is provided on diagnosis and the role of integrated cardiovascular imaging, medical therapy, interventional diagnosis and therapy, and surgical diagnosis and therapy. Importantly, up-to-date original information is presented on indications and guidelines/recommendations planned for publication in 2015. This well-illustrated book will be an invaluable aid to diagnosis and management for practitioners in a range of medical specialties, including cardiology, internal medicine, rheumatology, family medicine, cardiac surgery, nephrology, and endocrinology.
