

1. Record Nr.	UNINA9910135407403321
Titolo	Behavioural languages . Part 1-1 VHDL language reference manual / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, New Jersey : , : IEEE, , 2011
ISBN	0-7381-6605-7
Descrizione fisica	1 online resource (xiv, 628 pages)
Disciplina	621.392
Soggetti	VHDL (Computer hardware description language)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Adoption of IEEE Std 1076-2008. VHSIC Hardware Description Language (VHDL) is defined. VHDL is a formal notation intended for use in all phases of the creation of electronic systems. Because it is both machine readable and human readable, it supports the development, verification, synthesis, and testing of hardware designs; the communication of hardware design data; and the maintenance, modification, and procurement of hardware. Its primary audiences are the implementors of tools supporting the language and the advanced users of the language.
