

1. Record Nr.	UNINA9910135420803321
Titolo	Health informatics . Part 10441 Device specialization : cardiovascular fitness and activity monitor : personal health device communication
Pubbl/distr/stampa	New York : , : IEEE, , 2013
ISBN	0-7381-8267-2
Descrizione fisica	1 online resource (94 pages)
Disciplina	570.285
Soggetti	Medical instruments and apparatus - Standards Medical electronics Medical informatics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Within the context of the ISO/IEEE 11073 family of standards for device communication, a normative definition of communication between personal telehealth cardiovascular fitness and activity monitor devices and managers (e.g., cell phones, personal computers, personal health appliances, and set top boxes) is established in this standard in a manner that enables plug-and-play interoperability. Appropriate portions of existing standards are leveraged including ISO/IEEE 11073 terminology, information models, application profile standards, and transport standards. The use of specific term codes, formats, and behaviors in telehealth environments restricting optionality in base frameworks in favor of interoperability is specified. A common core of communication functionality for personal telehealth cardiovascular fitness and activity monitor devices is defined in this standard.
