

1. Record Nr.	UNINA9910135463203321
Titolo	ISO/IEC 23026; IEEE Std 2001-2002 : ISO/IEC 23026:2006, Software Engineering---Recommended Practice for the Internet---Web Site Engineering, Web Site Management, and Web Site Life Cycle / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	New York, NY : , : IEEE, , 2006
ISBN	0-7381-4972-1
Edizione	[First edition.]
Descrizione fisica	1 online resource (vii, 72 pages) : illustrations
Disciplina	650.028546
Soggetti	Extranets (Computer networks)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This document defines recommended practices for World Wide Web page engineering for Intranet and Extranet environments, based on World Wide Web Consortium (W3C) and related industry guidelines. This recommended practice does not address stylistic considerations or human-factors considerations in Web page design beyond limitations that reflect good engineering practice. Annex B contains topics which are not sufficiently mature or where there are not specific recommendations for inclusion in the current issue of this recommended practice.
