

1. Record Nr.	UNINA9910135463403321
Titolo	ISO/IEC 15802-2:1995 . Part 2 LAN/MAN management : Information technology - Telecommunications and information exchange between systems - Local and metropolitan area networks - Common specifications
Pubbl/distr/stampa	New York : , : IEEE, , 1995
ISBN	0-7381-0268-7
Descrizione fisica	1 online resource (96 pages)
Disciplina	004.68
Soggetti	Local area networks (Computer networks)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Services and protocol elements that permit the exchange of management information between stations attached to ISO/IEC standard local and metropolitan area networks are defined. The standard includes the specification of managed objects that permit the operation of the protocol elements to be remotely managed. In addition, an architecture for station discovery and the dynamic control of event forwarding is defined. Services and protocols that support station discovery and the dynamic control of event forwarding are defined. (Incorporating ANSI/IEEE Stds 802.1B-1992 and 802.1k-1993).
