

1. Record Nr.	UNINA9910135463503321
Titolo	ISO/IEC 15288 : 2008(E) IEEE Std 15288-2008 (Revision of IEEE Std 15288-2004) - Redline // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 2008
ISBN	0-7381-6941-2
Descrizione fisica	1 online resource (124 pages)
Disciplina	745.4
Soggetti	Sustainable design Design and technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Revision of ISO/IEC 15288-2004. This International Standard was jointly developed by ISO/IEC and IEEE. This International Standard establishes a common process framework for describing the life cycle of man-made systems. It defines a set of processes and associated terminology for the full life cycle, including conception, development, production, utilization, support and retirement. This standard also supports the definition, control, assessment, and improvement of these processes. These processes can be applied concurrently, iteratively, and recursively to a system and its elements throughout the life cycle of a system.
