

1. Record Nr.	UNINA9910135477303321
Titolo	ISO/IEEE 11073-10415:2010(E) . Part 10415 Device specialization-- Weighing scale : ISO/IEEE Health informatics--Personal health device communication / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	New York, NY, USA : , : IEEE, , 2010
ISBN	0-7381-6559-X
Descrizione fisica	1 online resource (52 pages)
Disciplina	574.012
Soggetti	Numerical taxonomy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Within the context of the ISO/IEEE 11073 family of standards for device communication, this standard establishes a normative definition of communication between personal telehealth weighing scale devices and compute engines (e.g., cell phones, personal computers, personal health appliances, and set top boxes) in a manner that enables plug-and-play interoperability. It leverages appropriate portions of existing standards including ISO/IEEE 11073 terminology, information models, application profile standards, and transport standards. It specifies the use of specific term codes, formats, and behaviors in telehealth environments restricting optionality in base frameworks in favor of interoperability. This standard defines a common core of communication functionality for personal telehealth weighing scales.
