| Sommario/riassunto      | From the stony desolation of Jordan's desert, it is but a step through a doorway into the bath house of the Qusayr 'Amra hunting lodge. Inside, multicolored frescoes depict scenes from courtly life and the hunt, along with musicians, dancing girls, and naked bathing women. The traveler is transported to the luxurious and erotic world of a mid-eighth-century Muslim Arab prince. For scholars, though, Qusayr 'Amra, probably painted in the 730s or' 740s, h'as proved a mirage, its concreteness dissolved by doubts about date, patron, and meaning. This is the first book-length contextualization of the mysterious monument through a compelling analysis of its iconography and of the literary sources for the Umayyad period. It illuminates not only the way |

of life of the early Muslim elite but also the long afterglow of late antique Syria.

| Sommario/riassunto      | A secure device identifier (DevID) is cryptographically bound to a device and supports authentication of the devices identity. Locally significant identities can be securely associated with an initial manufacturer-provisioned DevID and used in provisioning and authentication protocols to allow a network administrator to establish the trustworthiness of a device and select appropriate policies for transmission and reception of data and control protocols to and from the device. |
