1. Record Nr.   UNINA9910135625103321

   Titolo   Software Testing, Verification and Validation (ICST), 2015 IEEE 8th
                          International Conference on / / Institute of Electrical and Electronics
                          Engineers

   Pubbl/distr/stampa   Piscataway, New Jersey : , : IEEE, , 2015

   ISBN   1-4799-7125-1

   Descrizione fisica   1 online resource (256 pages)

   Disciplina   005.14

   Soggetti   Computer software - Verification

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Sommario/riassunto   The 8th edition of the IEEE International Conference on Software
                          Testing, Verification, and Validation (ICST) is the premier conference for
                          research in all areas related to software quality The ever increasing
                          complexity, ubiquity, and dynamism of modern software systems is
                          making software quality assurance activities, and in particular software
                          testing and analysis, more challenging ICST 2015 provides an ideal
                          forum where academics, industrial researchers, and practitioners can
                          present their latest approaches for ensuring the quality of today s
                          complex software systems, exchange and discuss ideas, and compare
                          experiences In this spirit, ICST welcomes both research papers that
                          present high quality original work and industry reports from
                          practitioners that present real world experiences from which others can
                          benefit.
