

1. Record Nr.	UNINA9910135764603321
Titolo	ANSI/IEEE Std 943-1986 : IEEE Guide for Aging Mechanisms and Diagnostic Procedures in Evaluating Electrical Insulation Systems // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, NJ : , : IEEE, , 1986
ISBN	0-7381-2776-0
Descrizione fisica	1 online resource
Disciplina	621.31937
Soggetti	Electric insulators and insulation - Testing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Background information necessary for proper construction of aging mechanisms and selection of diagnostic procedures when designing tests for functional evaluation of insulation systems for electrical equipment is presented. Aging mechanisms of insulation systems and methods for ascertaining correlation of aging during testing and aging during actual service are described. Diagnostic techniques for use in functional tests are also listed. The intent is primarily to aid committees in standardizing tests within the scope of their responsibilities.
